The classification by country is based on the affiliation data provided by authors when registering with the [RePEc Author Service](#). Authors claiming affiliations in more than one country are assigned to all these countries. For authors with no claimed affiliation an attempt is made to assign the author to a country based on the postal address, e-mail address or home page URL. The latter two works if the address is in a country top level domain and will thus fail for .edu, .com and other generic domains. Authors not assigned to a country are listed under 'Unknown Country'.

Statistics updated 2009-07-03
